

Mountain View Yacht Club
Board of Directors
Oversize Boat Procedure & Policy

(1) The maximum size of the boat allowed in a specific boat space is governed by the *Rules and Regulations of Mountain View Yacht Club, Inc, Effective April 14, 1999* or as subsequently revised.

The maximum length of the boat allowed in a specific boat space is the length overall of the boat, which includes platforms and pulpits. The maximum beam allowed in a specific boat space is the smaller of the allowed beam (from the Rules and Regulations), or the physical width constraints of the space without intruding into the abutting boat space.

(2) The Member, not Renter, proposing to place a larger than allowed boat in a space must request written permission from the MVYC Board of Directors. Said request shall contain the following information: Member name, address, phone#, Slip #, Boat make and model, year, length, beam, and the reason for the request. ***Complete the attached form.***

(3) The Member should solicit and include with the request to the Board, a statement of position on the request from each abutting slip owner. Abutting slip owners shall include the slip on either side of the subject boat space, the slip directly across the channel from the subject space, and any other space which may be directly affected.

(4) The Board will review the request and supporting documentation. A decision will be rendered based upon the impact the request may have on the equal rights of each individual Member to utilize the MVYC facility. Should the Board grant the request, the right to an oversize boat shall run in perpetuity only for the specific Member, specific boat space, and specific boat for which the request was granted. A request to transfer the right to another Member, a different slip, or a different vessel shall be considered a new request. Transfer of the boat space and/or boat to a spouse or immediate descendant family member shall not require a new approval.

MVYC OVERSIZE VARIANCE REQUEST

Please complete and return to the Irwin Management

To be completed by the Member requesting the Variance

The form is to be completed from Top to Bottom for submission to the Board.

Irwin Management can assist with Abutter information and form completion if needed.
